Right: Islington Square, London

We're Marshalls. We create better spaces.

Our specialist team helps to bring your designs to life, through a mix of building and hardscaping products, combined with innovative planning and design solutions.

With a fleet ready to meet you anywhere, we're constantly exploring the art of the possible in order to deliver better builds.

All of this starts with people, putting communities and the environment at the heart of everything we do.

While we draw on over a century of experience, we're also underpinned by new technology and state-of-the-art production capabilities.

Both allow us to be passionate about sustainable, ethical choices for design and build today, and into tomorrow.

That's why we remain the UK's leading supplier of sustainable concrete and natural stone for the built environment.

marshalls.co.uk/commercial

Putting people first

We pay our employees the Real Living Wage and have carried the Fair Tax Mark since 2015.

Trafalgar Square

Our landscaping materials are used in projects across the UK, including Trafalgar Square and London's South Bank.

Creating better futures for everyone.

We're committed to doing the right things for the right reasons, in the right way, ethically and sustainably.

From fairly traded stone to low carbon concrete bricks, we recognise that we can create better spaces by putting people, communities and the environment first.

We reduced our carbon footprint by 50% between 2008 and 2020. We're committed to continuing to reduce our carbon emissions and we'll do this by addressing every aspect of our business.

98% of Marshalls' manufactured products are made in Britain, reducing transportation carbon. All of our manufacturing sites (and the vast majority of our offices) are powered by 100% renewable energy.

All our concrete pavers are 100% recyclable, and we've already taken steps to minimise the use of carbon-intensive cement in our products, reducing the amount of cement we use in our concrete blocks by at least 40% - and as much as 60% at some sites.

With our own Euro 6 fleet operating from 50 manufacturing facilities nationwide, we can offer deliveries with low lorry miles and low carbon emissions, brought direct to site.

Our sustainability journey The story so far

An unrivalled collection of hard landscaping solutions.

Our carefully curated concrete collection offers a diverse range of options to meet the demands of any commercial space. Marshalls' commitment to quality, innovation and superior service means you'll be supported from start to finish.

The perfect product for your project

Look out for the icons below to help you make your product selection.

Priora permeable paving
SuDS paving solution, allowing easy drainage of excess surface water.

Edging available
Effortlessly complements Marshalls paving.

Steps available
Complement your paving with matching DDA compliant steps.

Kerbs available
Complement your landscaping with matching kerbs, in a range of profiles.

MaxiMix Technology™
Premium blended surface layer, robust and fade resistant.

marshalls.co.uk/commercial/product-sustainability

All our paving flags comply with BS EN 1339:2003, and all our blocks with BS EN 1338:2003.

Product sustainability

Refer to the icons shown for more information on a product's sustainability credentials.

100% renewable electricity
A product manufactured at a site exclusively using clean electricity.

Contains recycled water
A product manufactured at a works using recycled water during its manufacture.

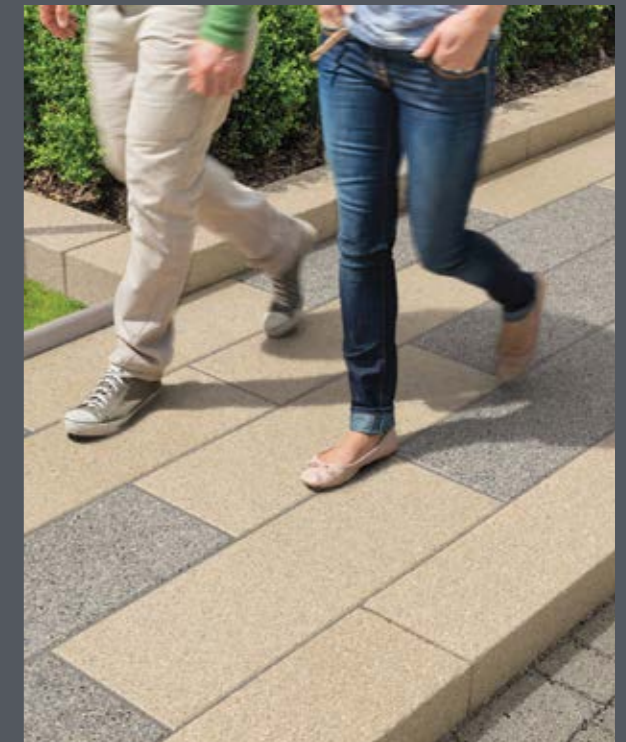

Secondary materials
A product using by-products of another process, for example, ash from a furnace.

Less cement
A percentage of carbon-intensive cement has been replaced with an alternative binder material to reduce the carbon impact.

British-made paving products to suit any budget and landscape.

Design inspiration

Create design-leading spaces
with Marshalls' concrete ranges.

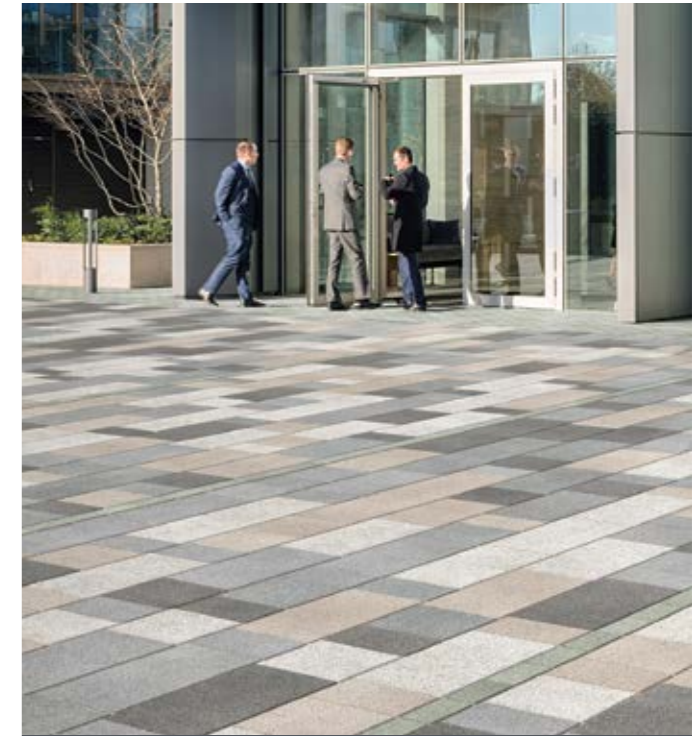

We offer a variety of options to give you the flexibility
you need to create beautiful and unique spaces.

Whatever your preference, find variety in colour,
size, pattern and texture.

Texture

Add dimension to your design
with our surface finishes.

Colour

Find your perfect palette from
our range of colours.

Size

Paving, setts and kerbs in a range
of sizes to suit all schemes.

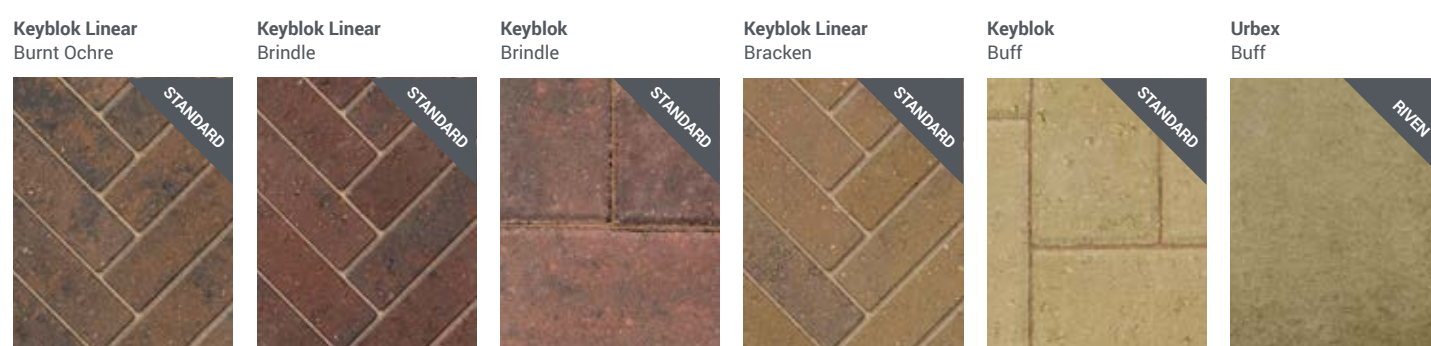

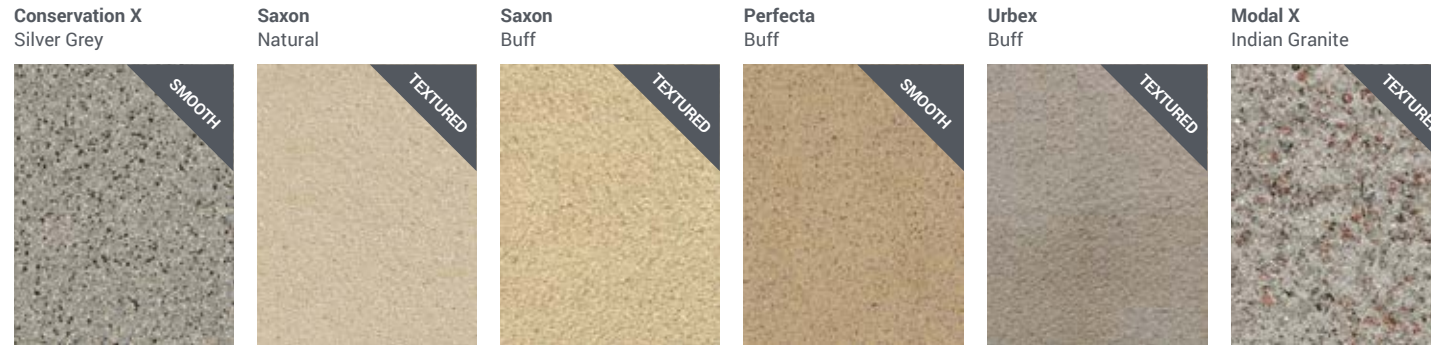

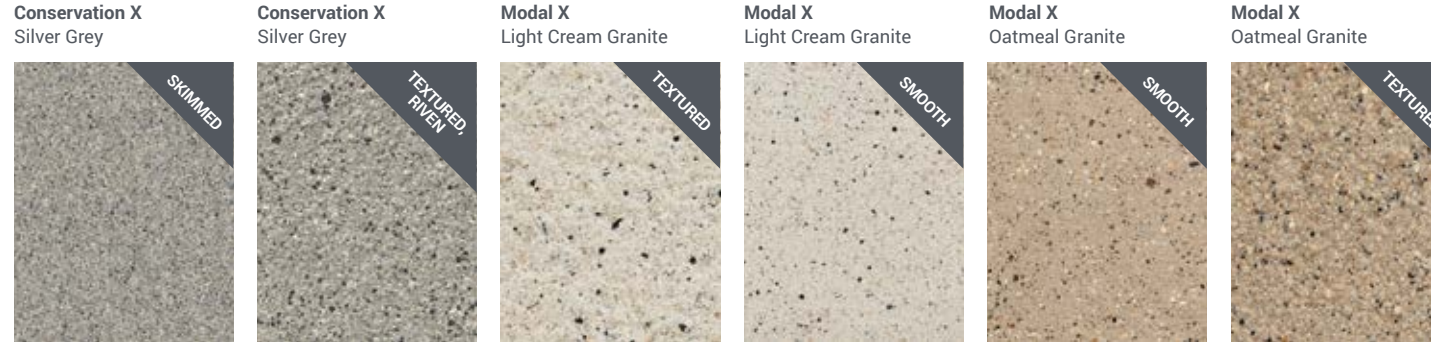

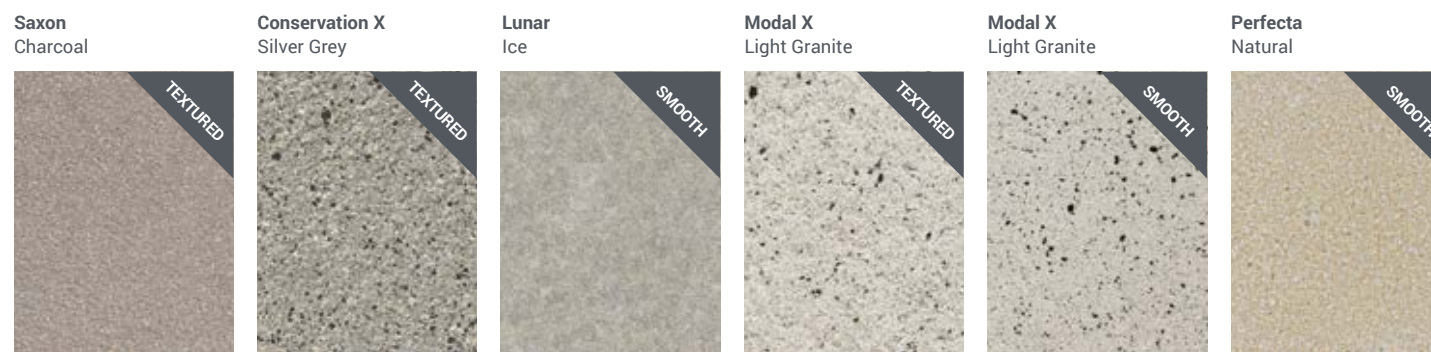

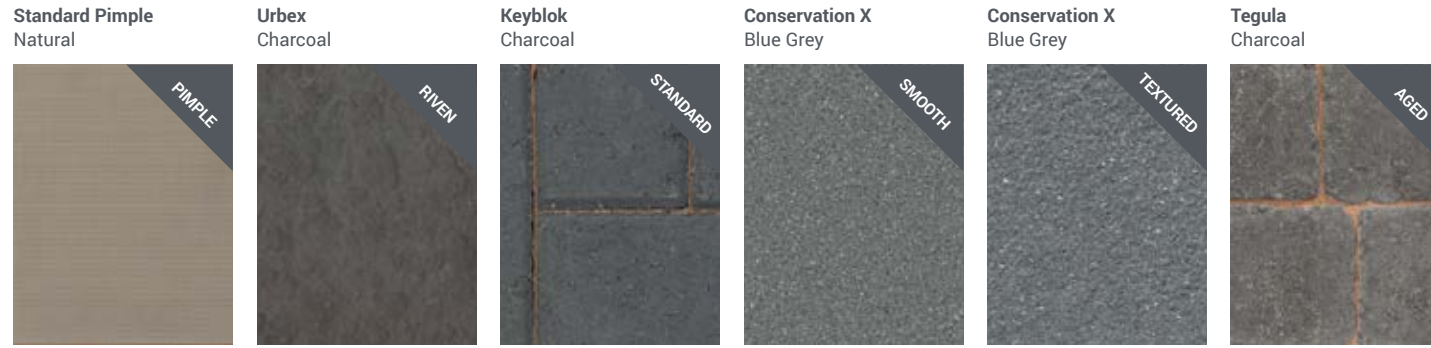

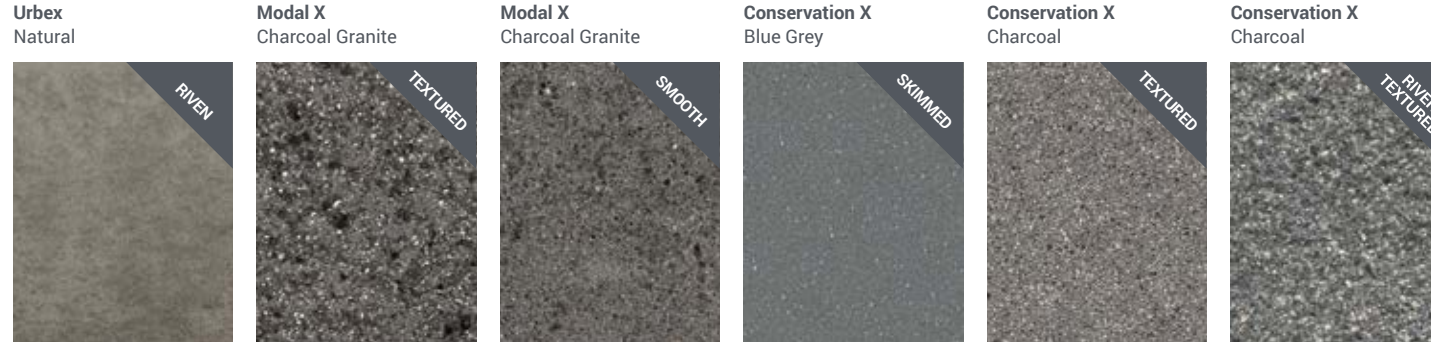

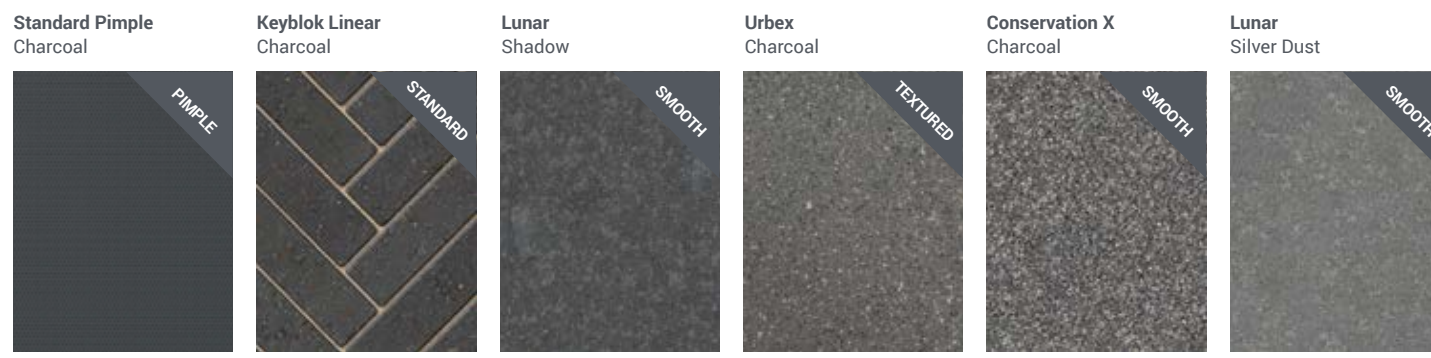

Pattern

Create bold laying patterns and standout designs
with our available plan sizes and colours.

Colour inspiration

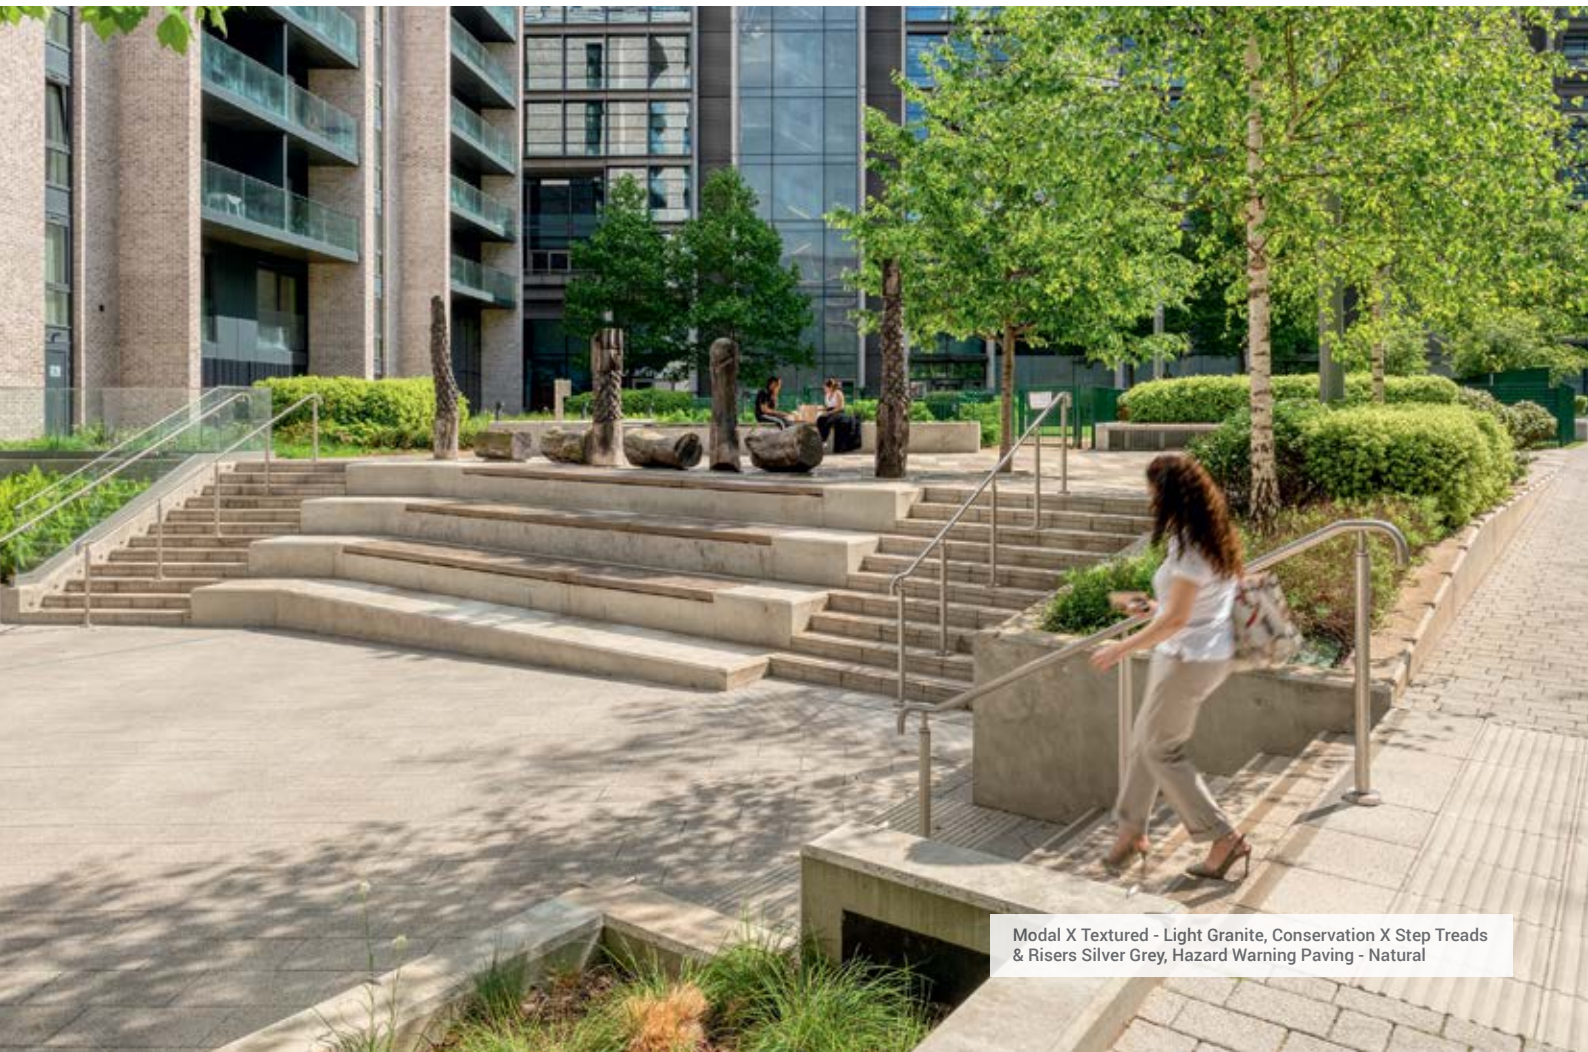

With a multitude of colours and textures to choose from, our concrete range offers endless design possibilities to create stunning landscapes.

Our textures & finishes

- Aged**
A lightly tumbled traditional finish.
- Pimple**
Raised pimples offer maximum skid and slip resistance.
- Riven**
Designed to replicate a naturally split riven surface.
- Standard**
Traditional block paving finish.

- Smooth**
Contemporary paving style.
- Skimmed**
Gentle exposure of the aggregate blend.
- Textured**
Hardwearing with a slightly coarse finish.

Concrete

Our concrete products are designed with durability and visual appeal in mind.

Perfect for high footfall areas both outdoors and under cover, our concrete pavers come in a diverse range of colours, sizes and textures to meet the demands of any environment.

Excellence and innovation are essential to everything we do. From using recycled materials to considering environmental risks and upholding ethical standards, you can rest assured that our concrete products are manufactured by doing the right things for the right reasons.

Where sustainability meets aesthetics.

Marshalls Piora Permeable

Combining outstanding SuDS drainage performance with the ability to create eye-catching designs, our Piora paving system is perfect for when sustainability and aesthetics are high on your agenda.

Piora paving not only looks great but also mitigates flood risk, removes surface water, and improves water quality without the need for additional linear drainage systems.

With the innovative nibs on its edges, each block or flag allows water to drain into the joints and into a specially prepared sub-base. Water then filters into the ground, or undergoes a controlled release into a designated drain, reducing the need for point drainage solutions.

Modal X

Inspired by high-quality natural granite, the new Modal X® range is our first product from the advanced dual block plant at St Ives. Available in eight colors, two finishes, 15 plan sizes, and five depths, including three sett sizes with a Textured Riven Surface, Modal X® also offers Piora permeable options. Drawing from the popular Conservation X and Modal ranges, Modal X® is ideal

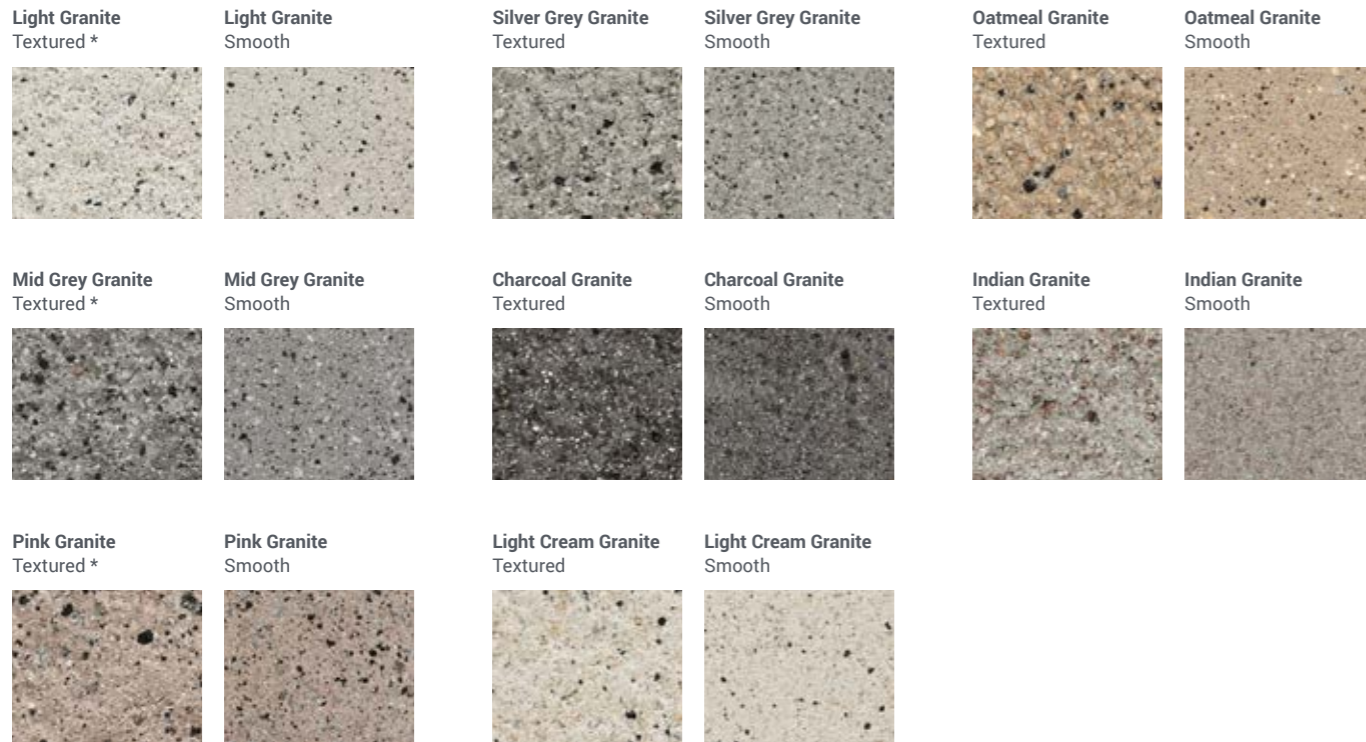

for pedestrian and high-traffic areas, offering limitless design potential with a wide selection of contemporary colors and formats.

- Available in both smooth and textured finishes
- 8 contemporary colours to choose from
- 15 plan sizes available

Conservation X Flag

Conservation X is a versatile paving collection providing a wide choice of colours, sizes and textures to bring a contemporary feel to spaces that require greater design flexibility.

This range is known for its unique blend and mix of natural crystalline aggregates that are exposed to achieve a granite-like finish.

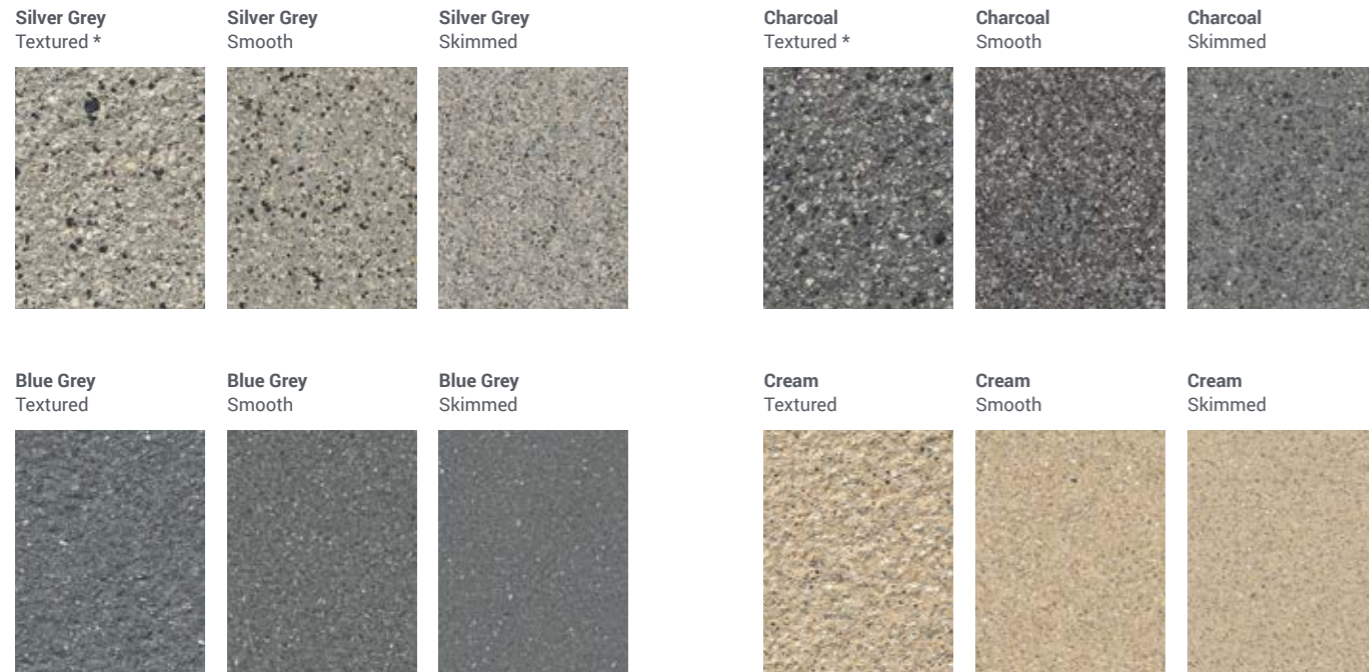

Also available in Piora Permeable options, Conservation X flag paving forms part of a comprehensive range of complementary Conservation X products.

- Available in four colours and three finishes
- A range of plan sizes available.

Conservation X Block

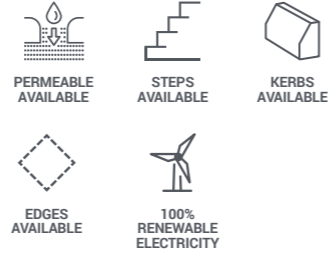

Conservation X Block is a multi-size range known for its unique blend and mix of natural crystalline aggregates that are exposed to achieve a granite-inspired finish.

The range includes our popular Silver Grey and Charcoal alongside our latest addition, Cream.

There are three sizes to choose from and each can produce a secure, interlocking paving design when laid that is suitable for any loading requirement.

- Available in three colours
- Three plan sizes and two thickness options to choose from.

Lunar

Lunar is an innovative, contemporary addition to our portfolio, available in a carefully curated range of four colours and five sizes.

Developed with UK designers, our unique granite-inspired blends are brought to life through a patented colour application - creating a multihued, subtle and elegant aesthetic.

Lunar block pavers are available in a smooth finish with pencil-chamfered edges, creating a modern yet timeless classic look.

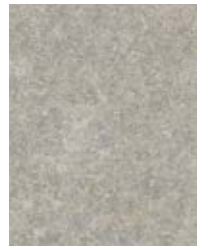

- Available in four colours and five sizes
- Perfect for both pedestrianised and trafficked areas.

Keyblok Linear

Inspired by traditional clay pavers, Keyblok Linear offers the elegant aesthetics of clay in a slimline design. It features rich colour blends, combining warm reds, pinks, and earth tones with cool grey and ochre hues for a contemporary look. Compatible with the Keyblok product family, these pavers come in various colours and sizes, all with matching pencil

edges. Manufactured in Britain using Marshalls concrete technology, they are durable and ideal for pedestrian and vehicular traffic, with nib detailing for easy installation.

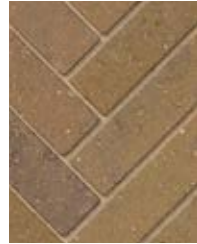

- Made in Britain, produces 54% less carbon than clay pavers
- More economical than clay, helping you maximise budgets.

Porcelain

Our porcelain paving is the ideal surfacing product for commercial balconies and roofdecks, combining elegant, modern aesthetics with low weight and excellent structural performance.

Porcelain & Pedestals

From balconies to roof decks, Marshalls' wide range of high quality porcelain paving products can transform any outdoor space while offering structural security.

Our pedestals are also appropriate for use with our concrete and natural stone ranges.

Our porcelain products are:

- Anti-slip
- Easy clean
- Frost resistant
- Stain resistant
- Water resistant.

Beautiful, hard-wearing natural stone paving products for your project.

In addition to our concrete and porcelain pavers, we also offer an extensive natural stone collection.

Well known for their strength and durability, each natural stone in the range offers both functional benefits as well as true natural beauty that is unique to every single scheme.

Ultimate flexibility

Our natural stone collection is available in:

PAVING

Paving

Inject new life into your scheme with Marshalls natural stone paving. Standard and tactile paving options available.

KERBS

Kerbs

Low maintenance solutions that promote great design and sustainability, we have an extensive collection of unique and robust high-quality kerbs.

SETTS

Setts

A unique look for public walkways and other trafficked areas.

FURNITURE

Furniture

For benches, bollards and other boosts to the landscape, Marshalls provides a range of stone street furniture products to builds big and small.

BESPOKE

Bespoke

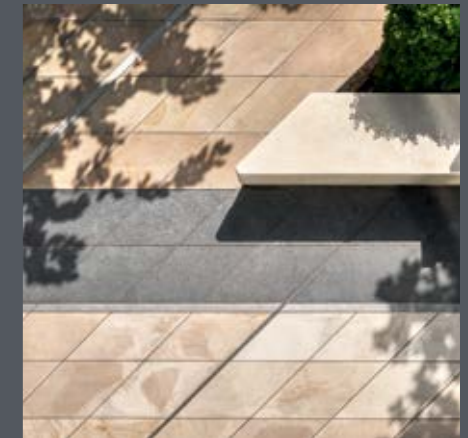

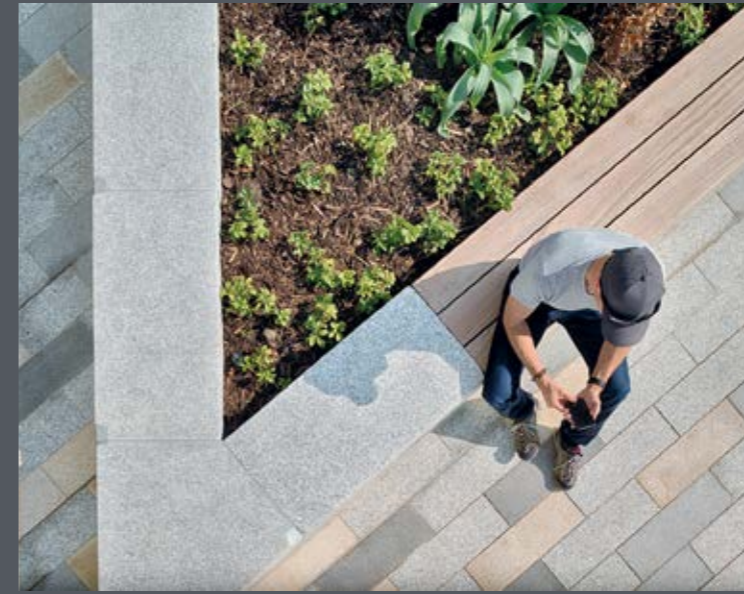

A truly unique proposition, giving designers the freedom to create a space that is one of a kind.

MASONRY & ARTWORK

Masonry & Artwork

The character and versatility of natural stone provides the perfect canvas to bring a creative vision to life, and in the right hands it can produce truly spectacular results.

Bespoke finishing

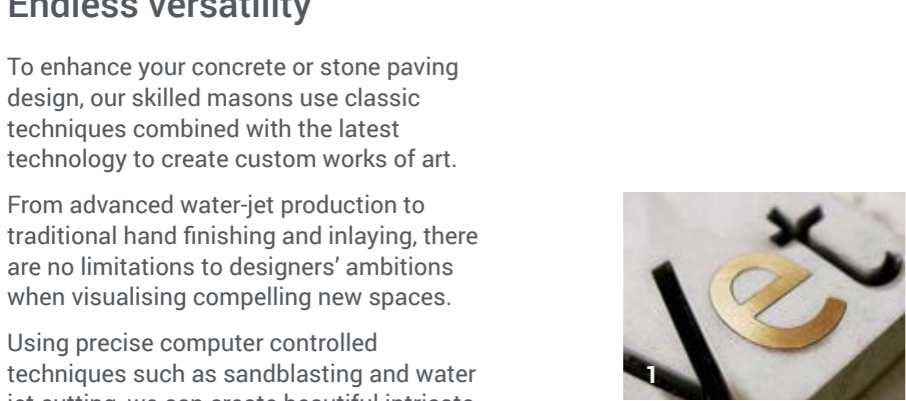

Endless versatility

To enhance your concrete or stone paving design, our skilled masons use classic techniques combined with the latest technology to create custom works of art.

From advanced water-jet production to traditional hand finishing and inlaying, there are no limitations to designers' ambitions when visualising compelling new spaces.

Using precise computer controlled techniques such as sandblasting and water jet cutting, we can create beautiful intricate lettering on both a large and small scale.

Secondary processes including hand painting and material inlays can give any design an added dimension, to make a real focal point.

1. Brass inlay lettering; 2&3. Stone engraving at the National Memorial Arboretum, Staffordshire; 4. Interlocking stone planter wall, Goldman Sachs, London; 5. Prospero benches at Monument Street, London; 6. Brass leaf detailing in stone at Long Itchington War Memorial; 7. Resin pour technique; 8. Stone block street furniture; 9. Gold inlay at Compton Courtyard.

Beyond paving, we offer a range of other solutions.

As a complete external landscaping products business, we cover all manner of outdoor space designs and functions.

Beyond paving, here are the other hard landscaping, infrastructure and water management solutions we supply:

Landscape Protection & Street Furniture

We offer both protective and non-protective street furniture solutions which blend seamlessly into any urban landscape design.

Bricks & Masonry

We offer a variety of manufactured concrete products for the construction industry that come in multiple finishes and colours to suit all building and aesthetic requirements.

Civils & Drainage

We make sustainable infrastructure, water management and retaining wall solutions for a safer and better environment.

Aggregates

From a network of wholly owned and trusted British quarries, we offer a choice of products from general purpose building sand to aggregates for groundworks.

We offer ranges that are all certified to British Standard requirements or higher.

Mortars & Screeds

We offer ready-to-use mortar, screed and flow screed delivered from a network of wholly owned manufacturing locations located across the UK.

Unlock the potential of your design.

Get support from our Design Team

Our in-house Design Team is available to provide expertise and specialist support to help bring your designs to life, working to save you time, money and carbon.

We can support every stage of your construction project; creating inspirational 3D designs, initial concept CAD models and providing warranted pavement engineering solutions.

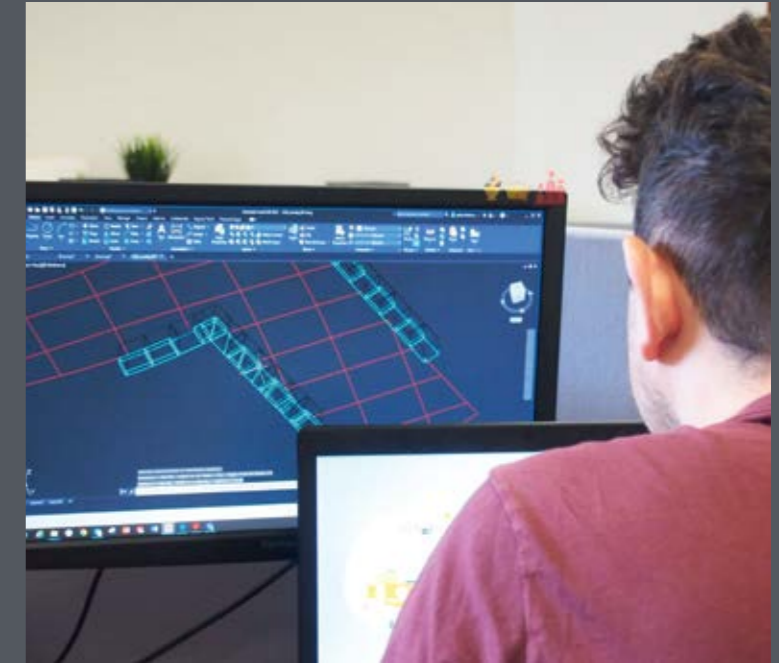

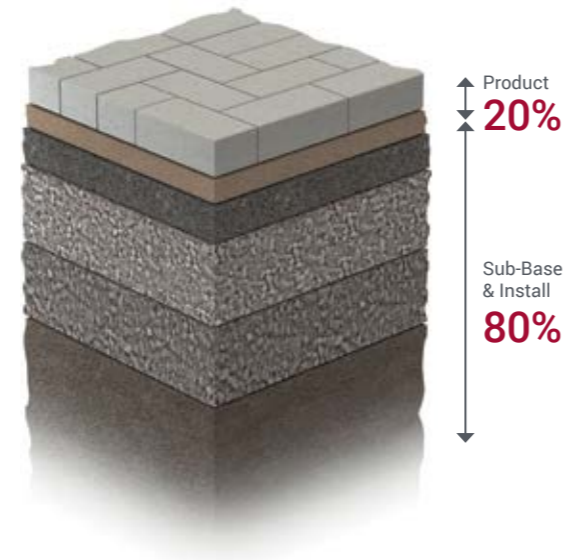

Services

- Technical support including value engineering
- Hard landscaping, sub-base and permeable paving design
- Design reviews and project assessments
- Sustainability consultation
- 3D visualisation and animation

Finding the right loading solution for your project

Only 20% of the pavement cost is actually the paving, the other 80% is the sub-base and the install process; it's crucial that this is built correctly.

Our pavement engineers understand how pavements work on and below the surface. Working to the new British Standards, we can recommend potential savings in the build-up and install that saves unnecessary material and labour costs.

Talk through the best solutions for your project with our Pavement Engineers.

Bespoke 3D visualisations of your project using Marshalls products.

Creating Better Places
