Building a sustainable future

 **Marshalls**
Bricks & Masonry

Concrete journey

Since we were established in the 1890s by Soloman Marshall, the company has transformed from a family-run stone masonry and quarrying business to become a leading UK manufacturer and supplier of high-quality building materials. Renowned for our commitment to sustainability, quality and craftsmanship in both residential and commercial projects alike.

In the 1950s, we ventured into concrete manufacturing, significantly broadening our expertise. This journey advanced further in 2018 when we began producing concrete bricks through the acquisition of Edenhall Bricks, diversifying our product range and enhancing our capabilities.

1890s

Marshalls Stone Masonry and quarrying

1950s

Marshalls starts producing concrete products

2018

Today

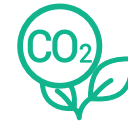

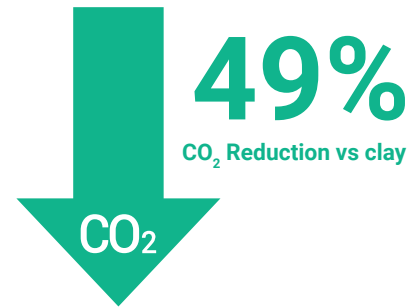

Marshalls continues to be a leading UK manufacturer and supplier of high quality concrete bricks and masonry

History

Lower carbon

At Marshalls, sustainability is central to our operations. Our concrete bricks offer superior durability and lower carbon footprints compared to traditional clay bricks. We use recycled materials, minimize water usage, and ensure energy-efficient production. Every brick we produce reflects our commitment to building a more sustainable future.

Net absorber of carbon

100% of our manufactured products are made in Britain

We use electricity that is from 100% renewable sources

All our concrete products are 100% recyclable

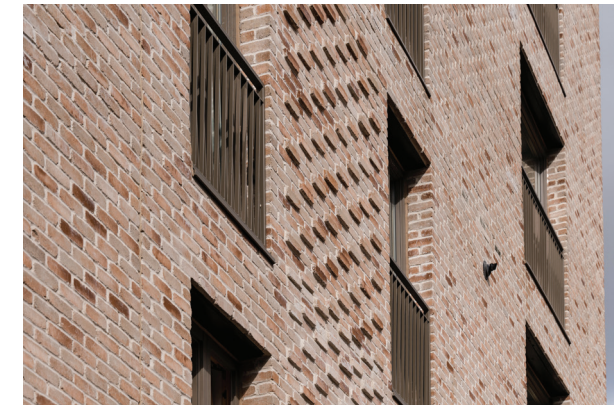

No Kilns required during the curing process, keeping our carbon footprint lower

First precast manufacturer to adopt CarbonCure Technologies, permanently locking waste carbon into our bricks

Sustainability

Key benefits

Quality is central to Marshalls Bricks & Masonry. Our products undergo rigorous testing to meet top industry standards. From frost and fire resistance to excellent thermal and sound insulation, our concrete bricks are designed to last. With Marshalls, you can build confidently, knowing every brick meets stringent quality criteria.

High quality and tested to BS771-3 :2011 A1: 2015 standard

Longevity - Bricks continue to age harden throughout their life cycle

Colour fast pigments

The mix design of the product ensures minimal risk of efflorescence and low levels of shrinkage and moisture movement

Manufacturing process ensures products are accurate, consistency in size means ease of laying/ installing

Frost resistant - all facing bricks can be classed as equivalent to F2/S2 rating for clay bricks

The composition of our bricks means they are fire resistant and are A+ rated

Quality
